DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with attorney David S. Stain (Reg. No.: 40828), on 01/04/2005.

The application has been amended as follows:

In the claim:

2. In claim 1, line 3, the term -- man-machine interface -- has been added between the terms "comprising" and "means"; the term "including" has been deleted; the term -- that includes -- has been added after the term "means"; the phrase "to set up a man/machine interface" has been deleted.

In claim 9, line 5, the term "and" has been deleted.

(End of Amendment)

Note: the above amendment has been made in order to place the claims in condition for allowance by adding/deleting the indicated subject matter.

Allowable Subject Matter

3. The following is an examiner's statement of reasons for allowance:

Regarding claims 1, 7, 9, 15 and 20, the previous art of record teaches of a method for management of a communications module, and a detachable microcircuit for

a terminal comprising means, including a microprocessor, to set up a man/machine interface in which the microcircuit and the terminal communicate by sending messages through a module-terminal connection between the module and the terminal.

The previous art of record fails to teach where **messages are sent from the microcircuit to the terminal, in the module, messages sent by the microcircuit are distributed between the module and the terminal to limit the communications on the module-terminal connection and to limit an activity, related to a processing of a message, of the microprocessor of the terminal.** In addition, the previous art of record fails to teach where **the communication module processor is configured to filter messages sent from the microcircuit to distribute the message between the module and the terminal to limit module-terminal communications on the link and to limit terminal processor message processing related activity.**

4. Claims 2-6, 8, 10-14, 16-19 and 21, respectively are dependent upon claims 1, 7, 9, 15 and 20; therefore, the examiner gives the same reasons for allowance as set forth above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
